

## CLAIMS

1. A pants-type diaper for playing in the water, characterized in that an absorbable main body is formed with a liquid permeable top sheet, a liquid impermeable sheet and an absorber intervening between the sheets, and three-dimensional gathers, which stand upright on the side of the liquid permeable top sheet on both side ends of the absorbable main body, form an excretory substance housing pocket on the liquid permeable top sheet.

2. The pants-type diaper for playing in the water according to claim 1, characterized in that an elastic stretch member is disposed on a waistband portion in the absorbable main body and side portions between the waistband portion and leg portions.

3. The pants-type diaper for playing in the water according to claim 2, characterized in that a tightening force of the elastic stretch members on the side portions, per width of 1 cm at the time of attachment is 140 gf/cm or more.

4. The pants-type diaper for playing in the water according to any one of claims 1 to 3, characterized in that a liquid permeable back sheet made of non-woven fabric is disposed on an outermost surface of the absorbable main body.

5. The pants-type diaper for playing in the water according to claim 4, characterized in that water pressure resistance of the non-woven fabric of the back sheet is 100 mmH<sub>2</sub>O or more and 500 mmH<sub>2</sub>O or less.

6. The pants-type diaper for playing in the water according to any one of claims 1 to 5, characterized in that the three-dimensional gathers are constituted so as to stand upright according to slipping-down of the diaper.

7. The pants-type diaper for playing in the water according to any one of claims 1 to 6, characterized in that a volume of the excretory substance housing pocket formed on the upper surface of the top sheet is 600 to 800 cm<sup>3</sup>.

8. The pants-type diaper for playing in the water according to any one of claims 1 to 7, characterized in that an amount of pulpwood included in the absorber is 10 g or less.

9. The pants-type diaper for playing in the water according to any one of claims 1 to 7, characterized in that the absorber does not include pulpwood.

10. The pants-type diaper for playing in the water according to any one of claims 1 to 9, characterized in that an amount of super absorbent polymer (SAP) included in the absorber is 10 wt% or less.

11. The pants-type diaper for playing in the water according to any one of claims 1 to 9, characterized in that the absorber does not include super absorbent polymer (SAP).

12. The pants-type diaper for playing in the water according to any one of claims 1 to 11, characterized in that a disposed area of the liquid impermeable sheet is larger than an area of the absorber and is 70% or less of a flat area of

the absorbable main body or less.
